TECHNICAL SKILLS

Front-End | JavaScript (ES5 and ES6), TypeScript, React, HTML5, CSS3, Redux, React Native, Hotwire

Back-End | Go, Node.js, Express, PostgreSQL, MongoDB, MySQL, RESTful API, ChatGPT-4 API

Testing/Deployment | Jest, Mocha, Chai, AWS: EC2 / RDS / S3, Vercel, Test Driven Development (TDD)

Developer Tools | Vim, Git, npm, Nx, Webpack, Babel, Agile Methodology, Vite, Pongo2

PROFESSIONAL SOFTWARE DEVELOPMENT EXPERIENCE

Full Stack Software Engineer [Coinsub Inc](#) | [Github](#) | *Go - Pongo2 - Javascript - Hotwired Turbo* 02/2024–present
Web application that processes recurring and one-time cryptocurrency transactions instantly and securely

- Implemented routing for the referral program, contributing to \$5,000 startup revenue
- Enabled transactions using USDT on the Polygon network using **Golang** and **Hotwired Turbo**
- Split transactions processing of the application into its own microservice
- Add pagination feature to all dashboard tables

Full Stack Software Engineer [coinsub.io](#) | [Github](#) | *React - TailwindCSS - MailChimp* 10/2023
Home page for Coinsub Inc. allowing prospective customers to learn more about Coinsub's product launch

- Designed and created custom components with **Miro, Figma, React, and TailwindCSS** that responsively load with animations
- Created email sign-up form that adds users to **Mailchimp** list
- Conditionally load custom modals created with **React and TailwindCSS** displaying email signup status and follow-up instructions for the user.

Back-End Software Engineer [Unlock Epiphany](#) | [Github](#) | *Zapier - Express - Postgres - ChatGPT-4 API* 10/2023
Send users emails with tailored, AI-generated life advice based on their Myers Briggs Type Indicator

- Uses **Zapier Webhook** that posts user responses to Typeform survey to database
- Uses Chat-GPT 4 API to generate life advice for one randomly selected user-selected topic of interest (i.e., dating, work-life balance, etc.)
- At intervals set by the user, send email with life advice and store life advice to the database.

SOFTWARE APPLICATION DEVELOPMENT EXPERIENCE

Full Stack Software Developer *Baby Name Generator* | [GitHub](#) | *Postgres - Express - React - Node.js* 7/2023
Website that generates a random baby name for a given gender and displays related information

- Created a user-friendly web application allowing users to select their preferred gender and send **Axios** request to Behind the Names API for randomly generated name
- Utilized Wikipedia API to display information about name etymology
- Seeded Postgres database with Social Security Administration name popularity data to graph name trends.

OTHER PROFESSIONAL EXPERIENCE

Green Dot Public Schools | School Psychologist 2019-2022

- Started a reading intervention group with 10 students per grade level on the verge of special education assessment referrals, reducing special education qualifications by 10% per grade level
- Increased student classroom participation time by 300+ hours by completing thorough record reviews in lieu of standardized testing

EDUCATION

Hack Reactor | Advanced Full Stack Software Engineering Certificate 2023

California State University, Long Beach | School Psychology, Ed.S. (M.A.)

- Graduate Dean's List 2019, Quantitative Educational Data Analysis, Educational Measurement and Assessment, OSEP Personnel Training Grant Recipient 2019

UC Berkeley | Psychology, B.A 2011-2015
